

of *Echinus flemingii* of unusual size, and as it was blowing fresh and there was some little difficulty in getting the dredge capsized, we gave little heed to what seemed to be an inevitable necessity—that it should be crushed to pieces. We were somewhat surprised, therefore, when it rolled out of the bag uninjured; and our surprise increased, and was cer-

FIG. 27.—*Calveria hystrix*, WYVILLE THOMSON. Two-thirds the natural size. (No. 86.)

tainly in my case mingled with a certain amount of nervousness, when it settled down quietly in the form of a round red cake, and began to pant—a line of conduct, to say the least of it very unusual in its rigid undemonstrative order. Yet there it was with all the ordinary characters of a sea-urchin, its interambulacral areas, and its ambulacral areas with their
