

APPENDIX A.—Table of Temperatures observed between Bahia and the Cape of Good Hope	Page 172
APPENDIX B.—Table of Serial Soundings down to 200 fathoms, taken between Bahia and the Cape of Good Hope.....	173
APPENDIX C.—Specific-gravity Observations taken between Bahia and the Cape of Good Hope during the Months of September and October, 1873.....	174

CHAPTER IV.

THE VOYAGE HOME.

The Strait of Magellan.—Dredging in Shallow Water.—The Falkland Islands.—Their Physical Features.—The Town of Stanley.—The Products and Commerce of the Falklands.—The Balsam-bog.—The Tussock-grass.—A Peculiar Mode of Reproduction among the Echinoderms.—“Stone Rivers.”—The Temperature Section between the Falklands and the Mouth of the River Plate.—Montevideo.—Meridional Section along the Central Ridge of the Atlantic.—Ascension.—An Island under Naval Discipline.—Voyage to Porto Praya and Porto Grande.—Soundings in the Eastern Trough of the Atlantic.—Vigo Bay.—Arrival at Spithead ... 176

APPENDIX A.—Table of Temperatures between the Falkland Islands and Tristan d’Acunha.....	234
APPENDIX B.—Table of Temperatures between Tristan d’Acunha and the Açores	236
APPENDIX C.—Table of Serial Temperature Soundings down to 200 fathoms taken in the South and North Atlantic in the Year 1876.....	238
APPENDIX D.—Specific-gravity Observations taken on the homeward voyage between the Falkland Islands and Portsmouth.....	239
APPENDIX E.—Stations in the Atlantic where Observations were taken in 1876 .	243

CHAPTER V.

GENERAL CONCLUSIONS.

Contour of the Bed of the Atlantic.—The Atlantic Ocean divided by a Series of Ridges into Three Basins.—Nature of the Bottom.—Pelagic Foraminifera.—Volcanic Débris.—Products of the Decomposition of Pumice.—Distribution of Ocean Temperature.—Laws regulating the Movements of the Upper Layers of the Atlantic.—Corrections of Six’s Thermometers.—Laws regulating the Movement of Water in the Depths of the Atlantic.—Doctrine of “Continuous Barriers.”—Distribution and Nature of the Deep-sea Fauna.—Universal Distribution of Living Beings.—Causes modifying and restricting the Distribution of the Higher Forms.—Relations of the Modern to the Ancient Faunæ.—The Density of Sea-water.—The Amount and Distribution of Carbonic Acid.—Of Oxygen..... 246

APPENDIX A.—The General Result of the Chemical and Microscopical Examination of a Series of Twenty Samples of the Bottom from the Observing Stations on the Section between Teneriffe and Sombrero	315
APPENDIX B.—Table showing the Amount of Carbonic Acid contained in Sea-water at Various Stations in the Atlantic.....	327
APPENDIX C.—Table showing the Relative Frequency of the Occurrence of the Principal Groups of Marine Animals at Fifty-two Stations at which Dredging or Trawling was carried to Depths greater than 2000 Fathoms.....	328
