

For notes on the Zoology of the Islands, see Von Willemoes Suhm, "Proc. R. Soc.," No. 170, 1876, p. 583.

For notes on the Geology, see J. Y. Buchanan, *Ibid.*, p. 614.

For Birds, see "Cabanis über zwei neue Finken-Arten." *Journal für Ornithologie*, 1873, s. 153, 154

The ship took ten days to reach the Cape of Good Hope ; the only interesting feature of the voyage was the appearance of the various Southern Oceanic birds which constantly were to be seen flying at the stern. The great albatross or Cape sheep, the Mollymauk, which however was not seen far from land ; the Giant-petrel (*Ossifraga gigantea*), the Cape hen (*Procellaria æquinoctialis*), the Cape pigeon (*Daption capensis*), a Prion and a Stormy-petrel.
