

PLATE XXIV.

Figures A. and B. plants of *Fimbristylis* (*Oncostylis*) *nesiotis*, natural size.

Figure 1.—Section of a leaf.

„ 2.—A spikelet.

„ 3.—Stamens and pistil from a very young flower.

„ 4.—Stamens and pistil from an expanded flower.

„ 5.—An anther.

„ 6.—A very young nut bearing the persistent enlarged base of the style: all the figures more or less enlarged.

Drawn from a specimen in the Kew Herbarium, collected by Sir Joseph D. Hooker.
