

### PLATE III.

The lettering is the same in all the figures.

- a* Acontia.
- b* Mesenteric filaments.
- c* Stomata in the septa.
- c<sup>1</sup>* Perioral stomata.
- c<sup>2</sup>* Marginal stomata.
- cu* Cuticle.
- d* Glandular streaks of the mesenteric filaments.
- e* Ciliated streaks of the mesenteric filaments.
- ek* Ectoderm.
- en* Endoderm.
- g* Reproductive organs.
- h* Septa. *rh* Directive septa.
- i* Oral disk.

- |           |   |                      |  |
|-----------|---|----------------------|--|
| <i>k</i>  | Wall.   | <i>p</i>             | Filamentous apparatus of the ovicells.               |
| <i>l</i>  | Pedal disk.   | <i>p<sup>1</sup></i> | Process of the oovicell.                             |
| <i>m</i>  | Muscles.  | <i>p<sup>2</sup></i> | Apical set of epithelial cells.                      |
| <i>ml</i> | Mesodermal muscles.   | <i>r</i>             | Marginal spherules.                                  |
| <i>ml</i> | Longitudinal muscles of the septa.  | <i>rh</i>            | Directive septa.                                     |
| <i>ml</i> | Retractor.  | <i>s</i>             | Oesophagus.  |
| <i>mp</i> | Parietobasilar muscle.  | <i>so</i>            | Openings of the oesophagus into the radial chambers. |
| <i>mt</i> | Transverse muscles.   | <i>sr</i>            | Oesophageal grooves.                                 |
| <i>mr</i> | Radial muscles of the oral disk and longitudinal muscles of the tentacles | <i>sz</i>            | Lappets of the oesophagus.                           |
| <i>ms</i> | Circular muscle of the wall.  | <i>t</i>             | Tentacles and the openings homologous with them.     |
| <i>me</i> | Mesoderm.   | <i>t<sup>1</sup></i> | Principal tentacles.                                 |
| <i>n</i>  | Urticating cells.   | <i>t<sup>2</sup></i> | Accessory tentacles.                                 |
| <i>o</i>  | Ovicells.   | <i>v</i>             | Openings of the pedal disk.                          |

- p* Filamentous apparatus of the oovicells.
- p<sup>1</sup>* Process of the oovicell.
- p<sup>2</sup>* Apical set of epithelial cells.
- r* Marginal spherules.
- rh* Directive septa.
- s* Oesophagus.
- so* Openings of the oesophagus into the radial chambers.
- sr* Oesophageal grooves.
- sz* Lappets of the oesophagus.
- t* Tentacles and the openings homologous with them.
- t<sup>1</sup>* Principal tentacles.
- t<sup>2</sup>* Accessory tentacles.
- v* Openings of the pedal disk.

All statements given as to magnifying powers have reference to Zeiss's system.

The magnifying powers amount to

|                      | Oc. 1. | Oc. 2. |    | Oc. 1. | Oc. 2. |
|----------------------|--------|--------|----|--------|--------|
| <i>a<sup>1</sup></i> | ...    | ...    | 6  | 10     |        |
| A                    | ...    | ...    | 55 | 70     |        |
| C                    | ...    | ...    | 95 | 125    |        |
| D                    | ...    | ...    |    | 195    | 240    |
| F                    | ...    | ...    |    | 410    | 550    |
| J                    | ...    | ...    |    | 470    | 530    |

A with unscrewed front lens (unscr. A) magnifies with Oc. 1 : 30 times; with Oc. 2 : 40 times.

Fig. 1. *Halcampa clavus*, bisected longitudinally so that the plane of division has opened two intraseptal spaces; twice the natural size.

Fig. 1, *a*. Half of the upper end of the body seen from the oral side; tentacles bent inwards; twice the natural size.

Fig. 1, *b*. Upper end of the body with expanded tentacles; twice the natural size.

Fig. 2. *Epizoanthus parasiticus*; natural size.

Fig. 3. *Tealidium cingulatum*, in a contracted condition, seen from the upper end of the body; twice the natural size.

Fig. 4. *Halcampa clavus*; natural size.

Fig. 5. *Comactis flagellifera*; twice the natural size.

Fig. 6. *Scytophorus striatus*; natural size.

Fig. 7. *Stephanactis tuberculata*, lateral view; natural size.

Fig. 7, *a*. *Stephanactis tuberculata*, from the oral side; natural size.

Fig. 7, *b*. *Stephanactis tuberculata*, lateral portion of the body with the oesophageal groove.

Fig. 8. *Ophiodiscus sulcatus*; natural size; greatly restored.

Fig. 9. A colony of *Epizoanthus parasiticus*, divided longitudinally; natural size.

Fig. 10. Pedal disk of *Halcampa clavus* detached and seen from the inside. A, Oc. 1.

Fig. 11. *Amphianthus bathybiuum*, seen from the surface; natural size.

Fig. 11, *a*. *Amphianthus bathybiuum*, a piece of the wall; slightly enlarged.

Fig. 11, *b*. *Amphianthus bathybiuum*, the margins of the pedal disk enclosing the *Mopsea*; slightly enlarged.

Fig. 11, *c*. *Amphianthus bathybiuum*, lateral view; natural size.

Fig. 12. Individual of a colony of *Epizoanthus*, opened longitudinally, and expanded; twice the natural size.
