

67	<i>L. seminiformis</i> , Schwager. Body circular, biconvex; with broad peripheral wing, extended at the base so as to form two points separated by a wide central depression,	Pl. LIX.	figs. 28-30.
68	<i>tricuspidata</i> , Reuss, sp. Wing extended into three equidistant points,		U.
69	<i>diptera</i> , Seguenza, sp. Wing broad; forming two wide-spreading pointed projections at the base,		V.
70	<i>L. lagenoides</i> , Will., sp. Body oval; with wide, conspicuously tubulated wing,	Pl. LX.	figs. 12-14, &c.
71	var. <i>tenuistriata</i> , Brady. Similar forms; the body ornamented with fine longitudinal striæ,	—	figs. 15, 16.
72	<i>L. ornata</i> , Will., sp. With cellulated wing,		W.
73	<i>L. formosa</i> , Schwager. Body long, flask-shaped, compressed; with tubulated wing, emarginate at the base, and with a raised border immediately surrounding the body, on both sides of the shell,	—	figs. 18-20.
74	var. <i>favosa</i> , Brady. Similar form with reticulated border within the wing,	—	fig. 21.
75	var. <i>comata</i> , Brady. Similar form, the body delicately striate,	—	fig. 22.
76	var. <i>brevis</i> , Brady. Short form, with punctate surface, the intermediate border transversely ribbed,	Pl. CXIV.	fig. 10.
77	<i>L. squamoso-marginata</i> , P. & J. Flasked-shaped, compressed; margin acute; surface squamose or areolated,	Pl. LX.	fig. 24.
78	<i>L. squamoso-alata</i> , Brady. Margin furnished with a tubulated wing, surface areolated,	—	fig. 23.
79	<i>L. radiato-marginata</i> , P. & J. Compressed, bordered; lateral surfaces marked with lines radiating from the centre	Pl. LXI.	figs. 8, 9.
80	<i>L. wrightiana</i> , Brady. Convex faces ornamented with parallel, longitudinal grooves, except near the centre,	—	figs. 6, 7.
81	<i>L. schulzeana</i> , Brady. Faces ornamented with transverse bars, horizontal at the middle and bent downwards near the periphery,	—	fig. 10.
82	<i>L. capillosa</i> , Schwager, sp. Carinate; carina partially divided on the median line,		X.
83	<i>L. trigono-marginata</i> , P. & J. Compressed on three sides, angles acute, bordered,	—	figs. 12, 13.
84	<i>L. trigono-ornata</i> , Brady. Compressed on three sides, angles decked with honey-combed ornament,	—	fig. 14.
85	<i>L. quadrangularis</i> , Brady. Flattened; quadrangular in section, the angles subcarinate,	Pl. CXIV.	fig. 11.
86	<i>L. quinquelatera</i> , Brady. Flask-shaped, compressed on five sides, equilateral, angles acute or subcarinate,	Pl. LXI.	figs. 15, 16.
87	Lagena orbignyana , Seguenza, sp. With three parallel carinæ; the central one widest,	Pl. LIX.	figs. 24-26.
88	<i>bicarinata</i> , Terquem, sp. With double margin and depressed median line,		Y.
