

PLATE XIII.

PENTACRINUS ASTERIUS, Linn., sp.

		Diam.	Page
Fig. 1. The calyx and arm-bases,	.	x 2	300
Figs. 2-4. A nodal joint from the upper part of the stem.	.	.	
Fig. 2. Upper face,	.	x 5	17
Fig. 3. Lower face,	.	x 5	17
Fig. 4. Side view,	.	x 5	14
Fig. 5. A nodal joint from the lower part of the stem ; lower face,	.	x 4	17
Fig. 6. The same ; upper face,	.	x 4	17
Fig. 7. Portion of an internode from near the top of the stem,	.	x 2	18
Fig. 8. Nodal and internodal joints from the lower part of the stem,	.	x 2	305
Fig. 9. Face of a young internodal joint,	.	x 5	15
Figs. 10, 11. Faces of older internodal joints,	.	x 4	17
Fig. 12. Terminal face of a pinnule-joint,	.	x 5	10
Fig. 13. Termination of an arm,	.	x 2	300
Fig. 14. One of the middle arm-joints and its pinnule,	.	x 4	286
Fig. 15. The ambulacral skeleton of an outer pinnule,	.	x 30	79
Fig. 16. Ventral aspect of the basal joints of a lower pinnule, showing the development of its ambulacral skeleton,	*	x 10	79
