

	PAGE
Fig. 1. <i>Esperella mammiformis</i> , subtylostylus; × 180,	63
Fig. 2. <i>Esperella lapidiformis</i> , stylus; × 75.	65
Figs. 3, 3a. <i>Esperella fusca</i> , tylostyli; × 180,	72
Figs. 4, 4a. <i>Esperella arenicola</i> , tylostyli; × 175,	73
Fig. 5. <i>Esperella nuda</i> , tylostylus; × 175,	71
Fig. 6. <i>Esperella porosa</i> , tylostylus; × 180,	70
Figs. 7, 7a. <i>Esperella simonis</i> , subtylostyli; × 180,	74
Fig. 8. <i>Esperella biserialis</i> , small tylostylus; × 180.	75
Figs. 8a, 8b. Large styli from the stem; × 78.	
Fig. 9. <i>Esperella porosa</i> , sigmata; × 180,	70
Fig. 10. <i>Esperella lapidiformis</i> , palmate anisochela, front view; × 360.	65
Fig. 10a. Palmate anisochela, side view; × 360.	
Fig. 11. <i>Esperella nuda</i> , palmate anisochelæ, front and side views; × 860,	71
Figs. 12, 12a. <i>Esperella simonis</i> , toxa; × 180,	74
Fig. 12a. Shows the remains of the cell in which the spicule developed still adhering to it.	
Fig. 13. <i>Esperella simonis</i> , sigma; × 180,	74
Fig. 14. <i>Esperella nuda</i> , sigmata; × 180,	71
Fig. 15. <i>Esperella fusca</i> , palmate anisochela, three-quarters front view; × 360.	72
Fig. 15a. Palmate anisochela, side view; × 360.	
Fig. 16. <i>Esperella simonis</i> , palmate anisochela, front view; × 360,	74
Fig. 16a. Palmate anisochela, side view; × 360.	
Fig. 16b. Palmate anisochela, small end, seen from in front, looking from the larger end.	
Fig. 16c. Young anisochela, front view; × 360.	
Fig. 17. <i>Esperella porosa</i> , palmate anisochela, front view; × 360,	70
Fig. 18. <i>Esperella mammiformis</i> , palmate anisochela, front view; × 360,	63
Fig. 18a. Palmate anisochela, side view; × 360.
