I. INTRODUCTION,	xi-xii
II. MORPHOLOGY—	
1. GENERAL STRUCTURE.—The Rhagon ; Types of Chamber-System, Eurypylous, Aphodal, and Diplodal ; Ectosome and Choanosome ; Subdermal and Subcortical Cavities. Types of Canal System ; the Oscule and Pores ; Secondary Canals or Epochetose System,	xiii-xxxv
2. HISTOLOGY.—Collenchyme and Collencytes, Sarcenchyme and Sarcencytes, Cystenchyme, Chondrenchyme, Thesocytes, Chromatocytes, Inocytes, Myocytes, Æsthocytes, Protoplasmic Continuity, Scleroblasts, Genital Products,	xxxv-xlvii
3. THE SKELETON.—Skeletal Elements, Opal, and Spongin ; Spicules, Structure, Classification, Ontogeny, Phylogeny, Ætiology of Spicules ; Types of Arrangement ; Extrusion of Spicules ; Source of the Silica of Flints,	xlvii-xci
4. ONTOGENY,	xci
5. CLASSIFICATION.—Position of the Sponges in the Animal Kingdom, Subdivision into Classes ; Classification of the Tetractinellida ; Description of Families and Genera,	xcii-clix
6. NOTE ON PHYLOGENY,	clx, clxi
7. METHODS OF INVESTIGATION,	clxi-clxvi
III. DESCRIPTION OF SPECIES—	
Order I. CHORISTIDA,	1
Suborder I. SIGMATOPHORA,	1
Family I. Tetillidæ,	1
<i>Tetilla</i> , O. Schmidt,	1-17
<i>Chrotella</i> , Sollas,	17-23
<i>Cinachyra</i> , Sollas,	23-30
<i>Craniella</i> , O. Schmidt,	30-41
Supplementary Account of Tetillidæ not in the Challenger Collection,	42-57
<i>Tetilla</i> ,	42-50
<i>Craniella</i> ,	50-55
<i>Fangophilina</i> , O. Schmidt,	55
Tabular View of the Tetillidæ,	56-57
Family II. Samidæ,	57
<i>Samus</i> , Gray,	57-59
Suborder II. ASTROPHORA,	59
Demus I. Streptastrosa,	59
Family I. Theneidæ,	59
<i>Thenea</i> (Gray),	59-78
<i>Pæcillastra</i> , Sollas,	79-86
<i>Sphinctrella</i> , O. Schmidt,	87-91
<i>Characella</i> , Sollas,	91-93
<i>Triptolemus</i> , n. gen.,	93-94
