

manu simili, nisi abbreviata et dilatata, carpo multo minore postice in processum elongatum, obtusum egresso. *Laminae fotoriæ* ellipticæ, margine longe-cirrato. *Ova* ovalia, flavescentia, long. 0.36 mm. Long. corp. ♂ usque 6.3 mm., ♀ usque 6½ mm." The fig. 36, referring to the ♀ of this species, only represents "corpuscula setigesta sensitiva," not therefore greatly contributing to the understanding of the species itself.

"Gen. 49. *Amphithoë* Leach. 65. *Amphithoë Vaillantii* Lucas." In the synonymy to this species he gives, "(An *Cymadusa* Sav. = *Amphithoë filosa* Aud.?)," and then describes "*Varietas pontica* mihi. Tab. vii. fig. 19-27. Mas. *Antennæ superiores* inferioribus longiores, reversæ usque ad abdomen pertinentes, pedunculo articulum 3-ium inferiorum non superante, dimidium flagelli æquante, articulo 1-mo incrassato, brevior quam caput, vix longior quam 2-do, 3-io trientem 1-mi æquante, flagello filiformi, articulis circ. 30, in apice filo olfactorio munitis. *Antennæ inferiores* incrassatæ, setosæ, pedunculo longo, articulo 1-mo (brevissimo) et 2-do junctis 3-io brevioribus, 4-to longior, flagello brevi, non multo longior quam articulus præcedens, articulis 18 (apicalibus exceptis) brevibus. *Oculi* parvi, rotundati. *Pedes paris 1-mi* et *2-di* longissimi, fortiores, unguibus fortibus, in margine posteriore denticulatis, *p. 1-mi* paulo minores, articulis 2-do et 3-io (art. 1-mus et 2-dus Luc.) in apice antrorsum spatuliforme fortissime productis, carpo et manu maxime elongatis, carpo in margine posteriore piloso, margine inferiore recte truncato, manu longior et fortior, pilosa, palma brevissima, leviter excavata, *p. 2-di* articulo 2-do (art. 1-mus Luc.) angustior quam in primis, in apice late spatuliforme fortissime producto, carpo elongato, triangulari, manu maxime elongata, dilatata, in apice antrorsum maxime producta et rotundata, palma brevior, profunde excavata, postice dente forti obtuso terminata. *Pedes paris 3-ii, 4-ti* et *5-ti* breves, *p. 6-ti* et *7-mi* valde elongati, sed anterioribus breviores. *Pedes spurii p. postremi* ramis brevissimis, externo hamulis duobus fortibus armato. *Telson* triangulare, angulis obtusatis. Corpus sordide-flavescens, maculis fuscis aggregatis. Long. corp. 9.46 mm. Femina. *Pedes paris 1-mi* articulo 3-io in apice haud producto, carpo abbreviato, margine inferiore curvo, palma haud convexa, *p. 2-di* carpo haud elongato, latiore, postice in processum rotundatum producto, manu haud elongata nec in apice producta. Long. corp. usque ad 8.73 mm.

Gen. 50. *Grubia*, nov. gen., is thus defined:—

"*Antennæ superiores* filiformes, pedunculo longo, tribus articulis, 1-mo incrassato, 2-do et 3-io maxime attenuatis, paulisper in flagellum longissimum multiarticulatum exeuntibus, flagello secundario uniarticulato, rudimentario; *a. inferiores* iis breviores, sed pedunculo longissimo, articulis 4 composito. *Pedes paris 1-mi* et *2-di* subchelati, 2-di multo majores, fortissimi. *Pedes spurii paris postremi* biramei, sed ramis ambobus minutissimis, rudimentariis, antecedentibus *paris 2-di* æquales, *paris 1-mi* paulo prominentes. Segmenta 11-mum et 12-mum spinis binis subter armata, 13-mum inerme. *Telson* squamiforme integrum." This contains one species, "66. *Grubia taurica* nov. sp., Tab. viii. fig. 1-10 [11]. *Antennæ* pilis tenuibus sparsis instructæ, *superiores* reversæ usque ad segmentum 7-mum vel multo longius pertinentes, articulis 29 ad 45, pedunculo dupla fere capitis longitudine et quarta flagelli principalis, articulo 1-mo vix brevior quam caput et vix longior quam 2-do, 3-io trienti 2-di æquale, flagello principali filis olfact. tenuioribus instructo, flagello secundario uniarticulato, minutissimo; *a. inferiores* ¾ superiorum æquales, articulis 29 ad 31, 1-mo (brevior) et 2-do junctis 3-io pæne æquantibus, 4-to vix longior quam 3-io, ¾ suæ longitudinis pedunculum superiorum superante. *Oculi* suborbiculares, rubri. *Pedes* pilis sat longis, tenuibus instructi; *p. paris 1-mi* carpo elongato postice in processum obtusum piligerum exeunte, manu subovali, æque longa et lata ac carpo, palma pilosa, ungue forti curvato, margine posteriore mollissime dentato. *Pedes 3-ii, 4-ti* et *5-ti* validi, articulo 2-do maxime dilatato, 4-to et 5-to dilatatis, ungue curvo, *paris 5-ti* multo
