

553). For a definition of the "Amphipoda Hyperiidea," see Note on Bovallius, 1887 (p. 587); and for notices bearing more or less directly on the definition of the group, see Notes on Claus, 1879 (pp. 487, 490) and 1887 (p. 596).

### Family SCINIDÆ.

Dana in 1852 placed the genus *Clydonia* in a subfamily of the Corophidæ which he constituted to receive it, and named Clydoninæ; Bovallius, having in 1885 established the identity of the genus *Clydonia* with the earlier *Tyro*, in 1887 changed the subfamily into a family, and named it the Tyronidæ; since *Tyro* itself falls to the earlier name *Scind*, it will be convenient to name the family Scinidæ. The definition given by Bovallius<sup>1</sup> for the family is as follows:—

"Head small. Eyes small as in the Gammarids. First pair of antennæ straight, styliform. Second pair of antennæ angularly bent, fixed at the inferior side of the head. Mandibles without palp. The seventh pair of pereiopoda [fifth peræopods] not transformed. The inner ramus of the uropoda coalesced with the peduncle."
