¹ On page 49, line 32, for 1834 read 1835, and for *Edwardsii* read *Edwardsi*, with a full stop.

² In the Brit. Mus. Catal. Amph. Crust., p. 186, "*Amphithoë Fresnelii*, Audouin," is given as a synonym of "*Melita Fresnelii*," instead of "*Gammarus Fresnelii*, Audouin," Milne-Edwards having previously attributed his "*Amphithoë Fresnelii*" to Audouin.

³ *Amphithoë Jurinii*? (Kroy.), is given by Bell and Westwood, probably by mistake so far as the authority cited is concerned, see pp. 281 and 1634.

⁴ On p. 305, lines 41, 42, omit the words "both before and;" *Cancer Gammarus obtusatus*, Montagu, was transferred to the genus *Melita* by Spence Bate in 1862.
