¹ Boeck, De Skand. og Arkt. Amph., p. 610, says that Stimpson referred the species "*A. serratus*, O. Fabr." to *Amphithonotus*, but that is a mistake, see p. 278, and Boeck himself, *op. cit.*, p. 240.

² This is Bruzelius' *Paramphithos tridentata*, which Boeck in 1870 transferred to *Halirages*.
