¹ This genus is provisional, see p. 564.

² On p. 365, line 16, for *nilsonii* read *nilssonii*; and on p. 400, line 6, for *Nilsonii* read *Nilssonii*.

³ To this species Czerniavski adds two varieties, *brevicornis* and *pontica*; see under *Nicca*.

⁴ If it should prove that *Hyalælla andina* (Philippi) is identical with *Hyalælla azteca* (de Saussure), de Saussure's specific name has the priority.

⁵ According to Bovallius, Arctic and Antarctic *Hyperia*, p. 561, this is synonymous with his *Euthemisto nordenskiöldi*.
