

CONTENTS.

	PAGE
PREFACE,	ix
INTRODUCTION,	xiii

CHAPTER I.

On the various Methods of Obtaining, Examining, and Describing Deep-Sea Deposits,	1-32
---	------

CHAPTER II.

On the Nature and Composition of the Specimens of Deep-Sea Deposits collected during the Challenger Expedition, and their Variations with Change of Conditions,	33-183
---	--------

CHAPTER III.

On Recent Marine Formations and the different Types of Deep-Sea Deposits: their Composition, Geographical and Bathymetrical Distribution,	184-248
---	---------

CHAPTER IV.

Materials of Organic Origin in Deep-Sea Deposits,	249-288
---	---------

CHAPTER V.

Mineral Substances of Terrestrial and Extra-terrestrial Origin in Deep-Sea Deposits,	289-334
--	---------

CHAPTER VI.

Chemical Products formed <i>in situ</i> on the Floor of the Ocean,	335-412
--	---------

APPENDICES.

Appendix

I. Explanation of Charts and Diagrams,	413-415
II. Report on an Analytical Examination of Manganese Nodules, by JOHN GIBSON, Ph.D., F.R.S.E., with Diagram,	417-423
III. Chemical Analyses,	425-496
