

PLATE XXIX.

A plant of *Atriplex plebeja*, natural size.

Figure 1.—A cluster of female flowers, with one male flower.

- „ 2.—A male flower.
- „ 3.—Front view of a stamen.
- „ 4.—Back view of a stamen.
- „ 5.—A female flower.
- „ 6.—A young female flower, with the bracteoles partially removed.
- „ 7.—A pistil in quite a young stage.
- „ 8.—A pistil in a more advanced stage : all very much enlarged.

The drawing represents a specimen in Kew Herbarium, collected by Carmichael.
