

The sexes are exactly alike. The figure (Pl. XVIII. fig. 1) is taken from specimen 291.

The types in the Museum of Leyden are marked "Borneo," which is a mistake. Bonaparte has given the exact locality.

This species has a very extensive range. I have seen specimens from Banda, Ceram-laut, Mysol, Salvatty, Waigiou, Mafor, Ternate, Dammar, Mareh, Motir, and Tidore. It is not quite certain that the bird described by von Pelzeln (*l.c.*) was really from the Arrou Islands.

5. *Myzomela boiei*, S. Müll.

Nectarinia (Myzomela) boiei, S. Müll., Verh. Land. on Volkenk., p. 172, 1839-44 (type examined).
Myzomela boiei, Salvad., Proc. Zool. Soc., 1878, p. 84; Forbes, Proc. Zool. Soc., 1879, p. 261.

[No. 295. Female. Eyes brown. Stomach had insects. The male of this bird had a red head, but no specimen was shot.]

6. *Zosterops chloris*, S. Müll.

Zosterops chloris, S. Müll. in Mus. Lugd. (type examined); Bp., Consp., vol. i. p. 398, 1850; Hartl Journ. f. Orn., 1865, p. 24; Salvad., Proc. Zool. Soc., 1878, p. 84.

[Nos. 287, male; 288, female. Eyes brown; legs slate-colour. Stomach contained insects. In flocks on trees near the shore.]

The sexes are exactly alike.

To this species have been referred also specimens from Ternate and Bouru; but those from Ternate agree better with *Zosterops intermedia*, Wall., from Celebes, and one specimen from Bouru in the British Museum, collected by Wallace, belongs to a species not yet described.

7. *Carpophaga concinna*, Wall.

Carpophaga chalybura, G. R. Gr. (*nec* Bp.), Proc. Zool. Soc., 1858, pp. 187, 196 (Arrou).
" *Carpophaga chalybea*, Bp." (errore), Rosenb. Journ. f. Orn. 1864, p. 132, sp. 226 (Arrou).
Carpophaga concinna, Wall., Ibis, 1865, p. 383, No. 52, Matabello Island, Arrou (a small island west of), type examined; Salvad., Ann. Mus. Civ. Gen., vol. ix. p. 200, No. 39, 1876; Proc. Zool. Soc., 1876, p. 85.
Carpophaga roseinucha, part., Schleg. Ned. Tijdschr. Dierk., vol. iii. p. 197, 1865.

[No. 296. Female. This bird was sent on board alive as a present to the Professor.]

IV. BIRDS OF THE KI ISLANDS.

[The ship arrived at Ki Doulan, Ki Islands, on the morning of the 25th September 1874, and left on the morning of the 26th September.]
