

11. *Sauromarptis gaudichaudi*, Q. and G.

*Dacelo gaudichaudi*, Quoy and Gaim., Voy. Uran. Zool., p. 112, pl. xxv. (1824), Waigiou, Guebé (type examined); Sharpe, Mon. Alced., pl. cxvi (1868-71).

*Sauromarptis gaudichaudi*, Salvad., Ann. Mus. Civ. Gen., vol. x. p. 306, sp. 35 (1877); Proc. Zool. Soc., 1878, p. 94.

[203, male; 204, female. Wokan. Eyes black; legs greenish, yellow tinge. Stomach contained insects and portions of leaves.]

The male has the tail blue, and the female has the tail chestnut.

12. *Sauromarptis tyro*, G. R. Gr.

*Dacelo tyro*, G. R. Gr., Proc. Zool. Soc., 1858, p. 171, pl. cxxx. Arrou (type examined); Sharpe, Mon. Alced., pl. cxvii (1868-78).

*Sauromarptis tyro*, Salvad., Ann. Mus. Civ. Gen., vol. x. p. 307, sp. 36 (1877); Proc. Zool. Soc., 1878, p. 94.

[No. 205. Wokan. Young male? Eyes black; legs greenish-yellow tinge. Stomach contained insects and portions of leaves.]

This bird differs from the adult in having the under parts entirely reddish, and in the blue of the wings inclining to greenish.

13. *Ægotheles wallacii*, G. R. Gr.

*Ægotheles wallacii*, G. R. Gr., Proc. Zool. Soc., 1859, p. 154, Dorey (type examined); Schleg. Ned. Tijdschr. Dierk., vol. iii. p. 340 (1866), Arrou; Salvad. Ann. Mus. Civ. Gen., vol. x. p. 310, sp. 7 (1877); Proc. Zool. Soc., 1878, p. 94.

*Caprimulgus brachyurus*, Rosenb., Nat. Tijdschr. Ned. Ind., vol. xxix. p. 143 (1867), Arrou (type examined).

[No. 259. Wanumbai. Female.]

I have compared this specimen with the type in the British Museum and with two other specimens from New Guinea, collected by D'Albertis and Bruijn's men. From all these it differs in the finer vermiculations, and in the somewhat smaller dimensions, and perhaps may belong to a different species; but we must see some more specimens from the Arrou Islands before we can decide the question.

The *Caprimulgus brachyurus*, Rosenb., is a young bird, with the tail incompletely developed.

14. *Macropteryx mystacea*, Less.

*Macropteryx mystacea*, Less.: Salvad., Proc. Zool. Soc., 1878, p. 95.

[No. 254. Wanumbai. Male. Eyes black.]

This bird has a brown spot on the ear-coverts.
