

Eyes black. Stomach had insects.

No. 664. Female. Porto Bueno.

Eyes brown.

No. 687. Male. Port Churrucha.

Eyes brown.]

16. *Eustephanus galceritus*, Mol.

*Eustephanus galceritus*, Scl et Salv., Nomencl., p. 90; Scl, Ibis, 1871, p. 181; Proc. Zool. Soc., 1878, p. 433.

[Nos. 614-616. Males. }  
No. 617. Female. } Juan Fernandez.

Eyes black; legs black.

No. 677. Male. Porto Bueno.

Eyes black.]

The occurrence of this Humming-bird on Juan Fernandez is now confirmed.

17. *Eustephanus fernandensis*, King.

*Eustephanus fernandensis*, King: Scl et Salv., Nomencl., p. 90; Scl, Ibis, 1871, p. 180; Proc. Zool. Soc., 1878, p. 434.

[Nos. 575-580, 582, 583, 585, 588-592. Males. }  
Nos. 593, 594. Males (young). } Juan Fernandez.]  
Nos. 595-600, 603, 605. Females. }

Of Nos. 575 to 592 it is noted by Mr Murray—"All males; eyes black; feet and bill black. Insects in stomachs. This was the most abundant bird on the island apparently. It would seem to be the male of the next lot (595-605)."

Of the last-mentioned lot Mr Murray noted—"I think there are strong reasons for believing that these are the females of the preceding. They were several times shot together on the same tree."

There can be no question of Mr Murray's view being correct. See my notes on this subject in Ibis, 1871, p. 181.

18. *Campephilus magellanicus*, Gm.

*Campephilus magellanicus*, Gm.: Scl et Salv., Nomencl., p. 98; Proc. Zool. Soc., 1878, p. 434.

[No. 667. Male. }  
No. 668. Female. } Porto Bueno.

Eyes yellow; feet and bill black. Stomachs had insects.]
