[a. Male. Marion Island.

Eyes brown.

b. Female. Caught at sea near Crozets.]

Without attempting to decide the question as to how many species of *Prion* exist, I use the name *Prion banksi* for these birds, as their bills agree most nearly with that of the type of *Prion banksi* in the British Museum.

[a. Male. Kerguelen.

Eyes dark grey.

b. Male. Betsy Cove, Kerguelen. Obtained January 1874.

c. Male. Christmas Harbour, Kerguelen.

d. Male. Betsy Cove, Kerguelen.

e-h. Females. Kerguelen.

i. Kerguelen.

j. Young. Kerguelen (?)

Called 'Horse-fart' by the whalers at Kerguelen, and builds its nest under the *Azorella* clumps, like the *Prion*.]

18. *Pelecanoides garnoti*, Less.

*Puffinuria garnoti*, Less., Voy. Coq. Zool., pl. xlvi.  
*Pelecanoides garnoti*, Coues, Pr. Ac. Phil., 1866, p. 190; Salv., Proc. Zool. Soc., 1878, p. 739.

[No. 639. Female. }  
 No. 640. Male (?) } Cove Harbour, Messier Channel.

Eyes hazel. These birds and another one which was put in spirit were found dead. Two were picked up by the boat in which Captain Maclear and I went, floating on the surface of the water; and the third was picked up by the galley on the rocks. They were quite fresh; the bodies were very thin.

Their stomachs were filled with small leaves. It looks very much as if these birds had got out of their region. Mr Moseley says he saw what he supposed to be one of these birds on Penguin Island.]
