

	D. ENTODERMA.	ENDODERM.	DARMBLATT.
<i>d</i>	<i>Entoderma,</i> <i>Lamina gastralis.</i>	<i>Hypoblast,</i> <i>Inner germinal layer.</i>	<i>Gastralblatt,</i> <i>Inneres Keimblatt.</i>

Internal primary germinal layer, corresponding to the internal simple germinal layer of the gastrula (or to the evaginated half of the blastula). In the Medusa it divides later into the permanent endoderm (or the epithelium of the gastrovascular system), the gelatinous mass (umbrella), and the supporting plates, &c.

<i>da</i>	Entoderma orale.	Oral endoderm.	Gastral-Epithel des Mundes.
<i>dc</i>	Entoderma canalis circularis.	Epithelium of the circular canal.	Gastral-Epithel des Ringcanals.
<i>df</i>	Entoderma filamentorum.	Epithelium of the gastral filaments.	Epithel der Gastral-Filamente.
<i>dg</i>	Entoderma gastrale.	Epithelium of the gastral cavity.	Inneres Magen-Epithel.
<i>dlk</i>	Entoderma cathammale.	Endoderm of the lines of fusion.	Gefäss-Platte.
<i>dl</i>	Entoderma loborum.	Epithelium of the lobe pouches.	Epithel der Lappentaschen.
<i>dp</i>	Entodermatis plicæ et processus.	Folds and tufts of the endoderm.	Falten und Zotten des Entoderms.
<i>dr</i>	Entoderma canalium radialium.	Epithelium of the radial canals.	Epithel der Radial-Canäle.
<i>ds</i>	Entoderma sexuale (Acraspeda-rum).	Germinal epithelium of the sexual organs (of the Acraspeda).	Keim-Epithel der Geschlechts-Organen (der Acraspeden).
<i>dt</i>	Entoderma tentaculorum.	Inner epithelium of the hollow tentacles.	Gastral-Epithel der hohlen Tentakeln.
<i>du</i>	Entoderma umbrale.	Dorsal epithelium of the canals.	Epithel der dorsalen Canal-Wand.
<i>dv</i>	Entoderma subumbrale.	Ventral epithelium of the canals.	Epithel der ventralen Canal-Wand.
<i>dz</i>	Entodermatis cellulæ chordales.	Notochordal cells of the solid tentacles.	Entodermale Chordal-Zellen (Axe der soliden Tentakeln).

	E. EXUMBRELLA.	EXUMBRELLA.	AUSSENSCHIRM.
<i>e</i>	<i>Paries umbrellæ dorsalis,</i> <i>Ectophragma.</i>	<i>Dorsal wall,</i> <i>Outer (convex) wall of the umbrella.</i>	<i>Rückenwand,</i> <i>Aeußere (convexe) Schirmwand.</i>

External or upper wall of the gelatinous umbrella, covered by a dorsal ectodermal epithelium; arched more or less convexly, corresponding to the calyx of polyps. It is divided by the umbrella margin from the subumbrella.

<i>ea</i>	Costæ adradiales.	Adradial ribs.	Adradiale Rippen.
<i>ec</i>	Fossa circularis.	Circular furrow of the exumbrella.	Ringfurche.
<i>eg</i>	Gyri radiales.	Radial gyri.	Radial-Wülste.
<i>ei</i>	Costæ interradales.	Interradial ribs.	Interradiale Rippen.
<i>el</i>	Fossa lobaris.	Radial furrow of the marginal lobes.	Lappenfurche.
<i>en</i>	Peronia tentaculorum.	Clasps of the tentacles.	Schirmspannen (der Narcomedusen).
<i>eo</i>	Crypta rhopalaris.	Niche of the rhopalium.	Sinnesnische.
<i>ep</i>	Costæ perradales.	Perradial ribs.	Perradiale Rippen.
<i>er</i>	Costæ radiales.	Radial ribs (in general).	Radial-Rippen.
<i>es</i>	Sulci radiales.	Radial furrows (of the exumbrella).	Radial-Furchen.
