

<i>gr</i>	Gastris sulci basales (perr.)	Gastral basal furrows.	Magen-Grundrinnen.
<i>gs</i>	Gastris sulci palatini (perr.)	Furrows of the palate.	Gaumenrinnen.
<i>gt</i>	Tubus gastralis.	Gastral tube.	Magenrohr.
<i>gu</i>	Paries gastris umbralis.	Umbral wall of the stomach.	Dorsalwand des Magens.
<i>gv</i>	Gastris valvulæ palatinæ (perr.)	Valves of the palate.	Gaumenklappen.
<i>gw</i>	Paries gastris subumbralis.	Subumbral wall of the stomach.	Ventral-Wand des Magens.
<i>gx</i>	Gastris sulci exumbrales (inter.)	Interradial furrows of the stomach.	Interradiale Längsfurchen des Magens.
<i>gy</i>	Pylorus (porta pylorica).	Pyloric door.	Magenpforte.
<i>gz</i>	Laminæ obelisci.	Obelisk plates of the central stomach.	Obeliskplatten des Central-Magens.

## H. ANTRUM.

## UMBRELLA-CAVITY.

## SCHIRMHÖHLE.

<i>h</i>	<i>Caverna umbrellæ.</i>	<i>Cavity of the nectocalyx.</i>	<i>Schwimmhöhle.</i>
----------	--------------------------	----------------------------------	----------------------

An open cavity under the concave umbrella, vaulted over by the subumbrella, and opening freely below (or only partially closed at the margin by the circular velum). The oral organs always lie in the central axial space of the umbrella cavity. All the walls of the umbrella cavity are covered by the ectodermal epithelium of the subumbrella.

<i>ha</i>	Apertura antri.	Opening of the nectocalyx.	Mündung der Schirmhöhle.
<i>hb</i>	Basis antri.	Floor of the nectocalyx.	Grund der Schirmhöhle.
<i>hl</i>	Antra lorum marginalium.	Cavities of the marginal lobes.	Lappen-Höhlen (der Narcomedusen).
<i>hr</i>	Recessus antri.	Niches of the nectocalyx.	Nischen der Schirmhöhle.

*i* I. INFUNDIBULA.

## FUNNEL-CAVITIES.

## TRICHTERHÖHLEN.

Open cavities lined by the ectodermal epithelium of the subumbrella, which are merely various kinds of processes, lateral spaces or secondary cavities of the umbrella cavity (Antrum).

<i>ia</i>	Apex infundibuli.	Summit of the funnel.	Trichterspitze.
<i>ib</i>	Infundibula basalia.	Basal funnels.	Basal-Trichter.
<i>ig</i>	Ostia subgenitalia.	Apertures of the subgenital cavities.	Oeffnungen der Subgenital-Höhlen.
<i>ii</i>	Infundibula interradsialia.	Interradial funnels.	Interradiale Trichter.
<i>il</i>	Infundibula lorum.	Funnels of the marginal lobes.	Lappen-Trichterhöhlen.
<i>io</i>	Infundibula oralia.	Oral funnels (outer buccal pouches).	Mundtrichter (äussere Backentaschen).
<i>ip</i>	Infundibula peduncularia.	Funnels of the peduncle.	Stieltrichter.
<i>ir</i>	Porticus subgenitalis.	Central subgenital vestibule.	Subgenital-Saal (der Monodemnien).
<i>is</i>	Infundibula subgenitalia.	Subgenital cavities (funnel cavities of the umbrella).	Subgenitalhöhlen (Schirmtrichterhöhl).
<i>it</i>	Infundibula tentaculorum.	Funnels of the tentacles.	Tentakel-Trichterhöhlen.
<i>iv</i>	Infundibula velaria.	Funnels of the velarium.	Velar-Trichter (der Cubomedusen).
