

Species of *Ophiomaza* not herein described.

Ophiomaza obscura, Lym., Bull. Mus. Comp. Zool., vol. iii., part 10, p. 233.

Ophiocnemis obscura, Ljn., Oph. Viv. Öf. Kong. Akad. p. 333, 1866.

Singapore.

Ophiothela.

Ophiothela, VII., Trans. Conn. Acad., vol. i., 1867.

Disk covered by very large naked radial shields and a few irregular scales. Numerous crowded tooth papillæ forming an irregular vertical oval. Teeth. No mouth papillæ. Arm spines thorny, clubbed and very short, borne on pad-like side arm plates which stand out free from the arm. Upper arm plates broken in irregular pieces, or represented by several wart-like swellings. The base of the jaw is pierced with a vertical hole. Interbrachial spaces somewhat swollen. Two large genital openings beginning outside the mouth shields.

The skeleton is like that of *Ophiothrix*.

TABLE OF SPECIES OF *Ophiothela*.

Radial shields large. Interbrachial spaces set with short, thick spines. Six arms whose upper surface bears grains or minute spines,	} <i>Ophiothela mirabilis</i> .
Radial shields large, and interbrachial spaces very narrow, and smooth or set with a few grains. Six arms, whose upper surface is sparsely granulated,	} <i>Ophiothela danaë</i> .
Disk above covered wholly by large smooth radial shields. Five arms which have a few warts or grains on their upper surface,	} <i>Ophiothela tigris</i> .
Disk covered by a thick skin, set with scattered grains which obscure the large radial shields. Six arms, whose upper surface bears larger and smaller grains,	} <i>Ophiothela isidicola</i> .
Disk with radial shields of moderate size, so that there is a free central space which with the shields bears thorny grains; and these are continued along the tops of the six arms,	} <i>Ophiothela dividua</i> .

Species of *Ophiothela* not herein described.

Ophiothela mirabilis, VII., Trans. Conn. Acad., vol. i. p. 268, 1867.

Panama Bay.

Ophiothela danaë, VII., Proc. Bost. Soc. Nat. Hist., vol. xii. p. 391, 1869.

Fiji Islands.

Ophiothela tigris, Lym., Ill. Cat. Mus. Comp. Zool., No. vi. p. 10, pl. i. figs. 10-12, 1871.
