REPORT on the HUMAN CRANIA AND OTHER BONES OF THE SKELETONS collected during the Voyage of H.M.S. Challenger, in the years 1873–1876. By WILLIAM TURNER, M.B., LL.D., F.R.SS. L. & E., Professor of Anatomy in the University of Edinburgh, Foreign Member of the Anthropological Society of Paris.

**PART I.—THE CRANIA.**

DURING the voyage of H.M.S. Challenger Human Crania and Skeletons were collected at several of the ports at which the ship called. These were entrusted to me by Sir C. Wyville Thomson on the return of the expedition. They consisted of specimens from the following localities:—

The Admiralty Islands,  
Hawaii, Sandwich Islands,  
Oahu, Sandwich Islands,  
Chatham Islands,  
New Zealand,  
Australia,  
Tierra del Fuego,  
Patagonia,  
Bush Race, from South Africa.

In this part the Crania only are described. The other bones will form the subject of a short second part in a subsequent volume.
