

## PLATE IX.

### Figs. 1, 2. RHIZOCRINUS LOFOTENSIS, Sars.

	×	Diam.	Page
Fig. 1. An entire specimen, . . . . .	×	3	259
Fig. 2. The calyx and arms, . . . . .	×	6	259

### Figs. 3-5. RHIZOCRINUS RAWSONI, Pourtales.

Fig. 3. General view of an entire specimen with the exception of the lowest part of the stem, <sup>1</sup> . . . . .	×	2	262
Fig. 4. Portion of an arm, from the side, . . . . .	×	12	60
Fig. 5. Dorsal aspect of an arm, . . . . .	×	12	60

*N.B.*—The magnification is only approximate, as in Pl. VIII.

<sup>1</sup> This figure was drawn from a dry specimen, parts of which had shown a tendency to separate ; and the gaps had consequently been filled up with gum. In consequence of this the syzygy between the first two brachials of the middle ray was wrongly drawn as a muscular joint like that between the second and third brachials. It should have been represented as a simple line without any gap between the joints, like the syzygies in the remaining part of the arm.
