

PLATE VIII.

- | | |
|--|--------|
| Fig. 1. Tip of one of the stouter dorsal bristles of <i>Eunoa iphionoides</i> , | × 210. |
| Fig. 2. Ventral bristle of the same species, | × 210. |
| Fig. 3. Tip of one of the attenuate silky hairs of the dorsal tuft of <i>Iphione spinosa</i> , | × 700. |
| Fig. 4. Inferior portion of the same bristle, | × 350. |
| Fig. 5. Tip of a ventral bristle of the same species in profile, | × 90. |
| Fig. 6. A small bristle from the same region of the foot, seen antero-posteriorly, | × 90. |
| Fig. 7. One of the fine pale dorsal bristles of <i>Iphione ovata</i> , | × 700. |
| Fig. 8. Tip of one of the second ventral series in the same species, | × 350. |
| Fig. 9. Tip of a dorsal bristle of <i>Eunoa opalina</i> , | × 90. |
| Fig. 10. Abnormal tip (from fracture?) of one of the same bristles, | × 90. |
| Fig. 11. Pale yellow ventral bristle of the foregoing, | × 90. |
| Fig. 12. Dorsal bristle of <i>Lænilla fusca</i> , | × 90. |
| Fig. 13. One of the average examples, from the ventral division of the foot, | × 90. |
| Fig. 14. Tip of one of the longer superior ventral bristles of <i>Polynoë platycirrata</i> , | × 210. |
| Fig. 15. Antero-posterior view of a smaller example from the same region, | × 210. |
