

PLATE XXVII.

- | | PAGE |
|---|------|
| Figs. 1-13. <i>Hyalonema sieboldi</i> , Gray, | 190 |
| Fig. 1. A dried specimen without the <i>Palythoa</i> -investment of the basal tuft;
$\times \frac{1}{3}$. | |
| Fig. 2. Terminal sieve-plate, outer side view; natural size. | |
| Fig. 3. Oxydiact with central thickening and barbs at both ends; $\times 300$. | |
| Figs. 4-6. Small amphidiscs of different sizes; $\times 300$. | |
| Fig. 7. Great amphidisc with knobbed axial beam; $\times 300$. | |
| Figs. 8, 9. Middle-sized amphidiscs; $\times 300$. | |
| Fig. 10. Oxyhexact with bent echinated rays; $\times 300$. | |
| Figs. 11, 12. Autodermal pentact pinules; $\times 300$. | |
| Fig. 13. Oxyhexact with straight echinated rays; $\times 300$. | |
| Figs. 14-23. <i>Hyalonema gracile</i> , F. E. S., | 196 |
| Fig. 14. Longitudinal section of a somewhat damaged specimen, preserved in
alcohol; natural size. | |
| Figs. 15-17. Small amphidiscs of different sizes; $\times 300$. | |
| Fig. 18. Principal triact with rough ends; $\times 300$. | |
| Fig. 19. Greater amphidisc with echinated axial beam; $\times 300$. | |
| Fig. 20. Oxyhexact with straight, smooth rays; $\times 300$. | |
| Fig. 21. Autodermal pentact pinulus; $\times 300$. | |
| Fig. 22. Autogastral pentact pinulus; $\times 300$. | |
| Fig. 23. Oxyhexact with smooth bent rays; $\times 300$. | |
