

PLATE XXXII.

Figs. 1-10. *Hyalonema robustum*, F. E. S.,

PAGE

229

Fig. 1. Lateral view of a great amphidisc ; $\times 300$.

Fig. 2. Terminal view of the same great amphidisc shown in fig. 1 ; $\times 300$.

Figs. 3, 4. Middle-sized amphidiscs ; $\times 300$.

Fig. 5. Small amphidisc ; $\times 300$.

Fig. 6. Oxyhexact with smooth bent rays ; $\times 300$.

Fig. 7. Autodermal pentact pinulus ; $\times 300$.

Fig. 8. Oxyhexact with straight echinated rays ; $\times 300$.

Fig. 9. Strong tetract with echinated ends from the basal pad ; $\times 300$.

Fig. 10. Strong diact with echinated ends and two central echinated knobs ; $\times 300$.

Figs. 11-16. *Hyalonema* sp., near *Hyalonema (Stylocalyx) depressum*, F. E. S., 231

Fig. 11. Great slender amphidisc with four cruciately disposed central knobs on the axial beam ; $\times 300$.

Figs. 12, 13. Middle-sized slender amphidiscs ; $\times 300$.

Fig. 14. Small amphidisc ; $\times 300$.

Fig. 15. Oxyhexact with straight smooth rays ; $\times 300$.

Fig. 16. Autodermal pentact pinulus ; $\times 300$.
