

## 1881. MEINERT, FR.

Crustacea Isopoda, Amphipoda et Decapoda Daniæ: Fortegnelse over Danmarks Isopode, Amphipode og Decapode Krebsdyr. Naturhistorisk Tidsskrift. III. Rækkes 12 Bind. 3. Heft. pp. 456-512.

Lists are given of species and the localities at which they were taken, and an account from Professor Schiødte of the tubes of *Haploops tubicola*, Lillj., which has small purple-red eyes. No new species of Amphipoda are described in this paper.

## 1881. MIERS, E. J.

Account of the Zoological Collections made during the Survey of H.M.S. "Alert" in the Straits of Magellan and on the Coast of Patagonia. Proc. Zool. Soc. Lond., January 1881.

There is here only an incidental allusion to the Amphipoda.

## 1881. MIERS, E. J.

On a small collection of Crustacea and Pycnogonida from Franz-Josef-Land collected by B. Leigh-Smith, Esq., lat. 79° 55' N., long. about 51° E., in the "Eira." The Annals and Magazine of Natural History. Ser. 5. Vol. VII. pp. 45-49. Pl. VII. London, 1881.

On *Acanthonotozoma inflatum* (Krøyer), Mr. Miers remarks, "A single female was obtained. This specimen agrees very well with Goës's figure of the species; but the anterior margin of the coxa of the 4th thoracic limb is regularly rounded, whereas in Goës's figure it is represented as somewhat angulated. The dorsal carina, which is described by Boeck as very high (*altissima*), on the first 3 post-abdominal segments, in Goës's figure and in our specimen is distinct, but not much elevated."

*Acanthostepheia pulchra*, n. s., is figured and described, with a comparison between it and *Acanthostepheia malmgreni*, Goës. *Amathillopsis affinis*, n. s., is figured and in like manner compared with its near ally *Amathillopsis spinigera*, Heller.

## 1881. MIERS, E. J.

Crustacea, in Markham's Polar Reconnaissance, 1881.

No new Amphipoda reported. Compare Note on Markham, 1880.

## 1881. MIERS, E. J.

On a collection of Crustacea made by Baron Hermann-Maltzan at Goree Island, Senegambia. Annals and Magazine of Natural History, September, October, November, 1881.

The only Amphipod included in this account is *Ampelisca tenuicornis*, Liljeborg, of which a detailed description is given.
