

Genus *Cerapus*, Say, 1817.

1817. *Cerapus*, Say, Journ. Acad. Nat. Sci. Philad., vol. i. pt. i. p. 49.  
 1823. " Desmarest, Dict. d. Sci. Nat., t. xxviii. p. 358 (S. I. Smith).  
 1825. " Desmarest, Consid. gén. sur la classe des Crustacés, p. 271.  
 1829. " Latreille, Le Règne Animal, t. iv. p. 122.  
 1830. " Milne-Edwards, Ann. d. Sci. Nat., t. xx. p. 383 (extr. p. 32).  
 1836. " Templeton, Trans. Entom. Soc. Lond., vol. i. pt. iii.  
 1838. " Milne-Edwards, Hist. Nat. des Anim. sans vertèbres, t. v.  
 1840. " (pars), Milne-Edwards, Hist. des Crust., t. iii. p. 60.  
 1840. *Cerapodina*, Milne-Edwards, Hist. des Crust., t. iii. p. 62.  
 1843.<sup>1</sup> *Cerapus*, Krøyer, Naturh. Tidsskr., R. 1, Bd. iv. p. 494 (footnote).  
 1849. *Cerapodina*, Dana, Amer. Journ. Sci. and Arts, ser. 2, vol. viii. p. 139.  
 1849. *Cerapus*, Dana, Amer. Journ. Sci. and Arts, ser. 2, vol. viii. p. 139.  
 1852. " Dana, Amer. Journ. Sci. and Arts, ser. 2, vol. xiv. p. 309; U.S. Explor. Exped., p. 832.  
 1852. *Cerapodina*, Dana, Amer. Journ. Sci. and Arts, ser. 2, vol. xiv. p. 309; U.S. Explor. Exped., p. 832.  
 1857. *Cerapus* (pars), White, Popular History of British Crustacea, p. 189.  
 1862. " (pars), Spence Bate, Brit. Mus. Catal. Amph. Crust., p. 262.  
 1862. *Siphonacetes* (pars), Bate and Westwood, Brit. Sess. Crust., vol. i. p. 469.  
 1874. *Cerapus* (pars), S. I. Smith, Invert. Anim. Vineyard Sound, p. 565 (271).  
 1880. " S. I. Smith, Trans. Connect. Acad., vol. iv. p. 277.  
 1882. " Sars, Oversigt af Norges Crustaceer, pp. 31, 113.  
 1885. " (pars), Carus, Prodromus Faunæ Mediterraneæ, pars ii. p. 393.  
 1885. *Cyrtophium*, Giles, Journ. Asiatic Soc. Bengal, vol. 54, pt. ii. p. 55.

For original definition of the genus, see Note on Say, 1817 (p. 100). Boeck's definition is inapplicable, being based in fact on species of the neighbouring genus *Ericthonius*, Milne-Edwards. In connection with those already given for the family (and subfamily), the following characters may suffice for the genus:—

*Mandibles* with the third joint of the palp nearly or quite equal in length to the second.

*First Maxillæ* with the inner plate small.

*Maxillipeds* with the palp elongate, having its fourth joint armed with an unguial spine.

*Antennæ* subequal in length, both pairs stout, with short flagella.

*Second Gnathopods* in the male much stronger than the *First*, having the wrist much larger than the hand.

*First and Second Peræopods* with the first joint much dilated.

*Third and Fourth Peræopods* with the terminal joints reversed.

*Pleopods* without cleft spines on the first joint of the inner ramus.

*Second Uropods* uniramous.

*Telson* bilobed.

<sup>1</sup> The genus *Lusyta*, Nardo, 1847 (see Note on Nardo, 1869, p. 390), is probably a synonym of *Ericthonius* rather than of *Cerapus*.
