

# INDEX OF GENERIC NAMES.

NOTE.—The names held to be valid are printed in black letters, those of which I have been unable to find any published description are in ordinary type, and synonyms and preoccupied names in italics. When the author of a generic name has himself given or indicated the derivation of it, his own statement in the original language or translated appears between marks of quotation. The derivations of new generic names, having already been given in the text, are not repeated here. Dark numerals refer to the page on which the definition of a genus occurs.

<b>Acanthechinus</b> , Stebbing, 1888,	461, 547, 574, <b>883</b>
<i>Acanthonotosoma</i> , alteration of <i>Acanthonotozoma</i> , Boeck, to suit the derivation,	599
<b>Acanthonotozoma</b> , Boeck, 1876. “ <i>ἄκανθα</i> , spine, <i>νωτος</i> , back, <i>σῶμα</i> , body.” Instead of <i>Acanthonotus</i> ,	162, 395, <b>453</b>
